EXPERIENCE

Reach Network, Inc., Seattle, WA

Front End Developer

July 2020 - Dec 2024

- Engineered high-traffic, user facing web pages (50K+ monthly visitors) to optimize user engagement, directly contributing to increased lead generation and quality.
- Championed and ensured WCAG compliant accessibility (A11y) standards across all new feature development, proactively integrating best practices from design to deployment.
- Developed complex SQL queries for data extraction from custom components and a React powered CMS, empowering data driven insights and enhancing the overall user experience.
- Designed and deployed responsive web features and reusable component templates using HTML, SCSS, React, and JavaScript, elevating user experience and site performance.

Western Washington University, Bellingham, WA

Web Developer

June 2019 - June 2020

- Orchestrated cross-departmental efforts with two university departments to optimize content delivery pipelines, ensuring effortless and timely publication of new materials.
- Implemented front-end components and user interfaces based on design mockups and guidelines from the design team.
- Maintained strict adherence to WCAG and A11y accessibility guidelines across all web properties, directly supporting continued federal funding eligibility and regulatory compliance.

Western Washington University Alumni Association, Bellingham, WA

Student Manager

July 2015 - June 2019

- Developed and managed weekly schedules for student and full-time staff, optimizing resource allocation.
- Streamlined communication channels between full-time and student staff to promote team collaboration and operational efficiency.
- Coordinated and supervised monthly alumni engagement events, ensuring successful execution and positive participant experience.
